Step 2: Take out the fixed lock body mounting plate

Step 3: Install the lock body

Step 4: Install the fixed lock body mounting plate

The fifth step; install the magnetic sheet

Step 6: Schematic diagram of installation completion

Anti-theft hex screw design

The access control magnetic lock uses hexagonal screws and is equipped with a special screw wrench, which is safe and anti-theft, and cannot be disassembled by outsiders, adding an insurance!

High strength aluminum alloy material

The access control magnetic lock is made of aluminum alloy as the main material, which is sturdy and durable. It is suitable for iron doors, wooden doors, stainless steel doors, fire doors, security doors, and framed glass doors.
