**OBT-6000C MEETING EXTENSION UNIT**

**OBT-6000C MEETING EXTENSION UNIT**

For a large conference, when more than 64 units are used for attendance, due to the limited power of the conference host, it will not be able to drive too many units for attendance, which requires the help of the capacity expansion host. All the conference hosts in our company use the same capacity expansion host, which is convenient to use.

- Power: 450W;
- 220V~230V, 50Hz/60Hz AC power supply;
- Six 8-core sockets are used for system multi-way connection and two are used to connect other expansion host ports;
- Can be placed flat on a table or installed in a 19-inch standard cabinet.
